Veenat 400mg Imatinib Tablets: Veenat 400mg is a medication that contains the active ingredient imatinib. Imatinib is a tyrosine kinase inhibitor used in the treatment of certain types of cancers, particularly chronic myeloid leukemia (CML) and gastrointestinal stromal tumors (GISTs).

Indications:

Chronic Myeloid Leukemia (CML): Veenat 400mg is often prescribed for the treatment of CML, a type of leukemia characterized by the uncontrolled growth of abnormal white blood cells. It is effective in inhibiting the activity of the abnormal tyrosine kinase enzyme associated with CML.

Gastrointestinal Stromal Tumors (GISTs): Veenat 400mg is also used in the treatment of GISTs, which are tumors that develop in the gastrointestinal tract. Imatinib works by targeting specific proteins that promote the growth of cancer cells.
