violent aggressive dominant black men: Hello, let's say we may have common interests? We're looking for violent aggressive dominant black men who would be interested in taking ownership of, training and torturing, white women and girls who have been "disappeared" as enemies of the state by the current US administration. The males, husbands / fathers etc, are sent to "black op" prisons, interrogate / torture kill facilities in places like Guatemala. We get the females to dispose of, the only requirement is that we get video back of their use and destruction. If you would be interested in helping us dispose of these women, with the understanding we receive video, please respond immediately. We currently have a couple of families, mothers and daughters, in the pipeline if you're interested?
